

Dialysis
with a difference

There are three Midwest Dialysis Centers located conveniently throughout the Miami Valley area. We also offer home hemodialysis options for patients throughout west central Ohio. The Midwest Dialysis Centers practice dialyzer reprocessing. For more information, see center personnel

"Convenient quality care."

Experience the difference of Midwest Dialysis care.

When it comes to dialysis treatment, there is a difference. At Midwest Dialysis Centers we provide quality, personal care in a safe and comfortable environment at three convenient locations around the

Miami Valley. As a locally owned and operated dialysis provider with a legacy of service dating back more than 25 years, we offer a level of service and accountability not found at any of the national chain facilities. At Midwest Dialysis an experienced, caring staff using the latest in technology provides quality treatment tailored to the individual patient. Visit us to experience the difference in **personal care**, **convenience** and **treatment options**.

We give the *personal care* you should expect.

Caring for the individual takes on many dimensions at Midwest Dialysis Centers. It starts with patient-to-staff ratios that allow us the time to provide

attentive care and excellent treatment. Our expert nephrologists work closely with your personal physician to ensure proper treatment and excellence in care management. Our team is focused on your entire well-being, with an emphasis on both care and wellness. In addition to providing outstanding medical and nursing care, our facilities address the holistic needs of our clients through educational programs, nutritional counseling and ongoing counseling and social work services.

Choose from a full range of *treatment options*.

At Midwest Dialysis, we offer the most comprehensive range of dialysis treatment options in the region. In addition to our three in-center programs, we operate a nationally recognized home hemodialysis program. We are one of only a handful of dialysis programs in the United States offering the option of nightly home hemodialysis.

You have the choice of better care.

As a team of local medical professionals, we at Midwest Dialysis Centers are committed to the care of people who live in our community. Unlike national chains, we are locally owned and operated by the medical experts that serve you. Our physicians reside in the area in which they work and our locally-based management ensures that Midwest Dialysis will always remain responsive to you!

When you need dialysis care, call on your local team of experienced professionals offering more options in an environment of care.
